

**All Together Better**  
Hearing For You

# The **All Together Better** Hearing Solution

**Oticon Acto** is designed to let you hear what you need to hear with greater comfort and convenience. The devices automatically adapt to the environment so that you can follow conversations, even in challenging situations.

**Oticon Acto** is discreet and elegant. Whether you choose an Acto that fits securely inside your ear or discreetly behind it, you'll feel more confident in how you communicate with others.

**Oticon Acto** is wireless, enabling you to connect to devices such as cell phones, TV and MP3 players. Acto provides you with the best opportunity to make the most of your hearing devices.

## Better **Access To** **Clear Sound**

Clear sound and the ability to understand speech go hand in hand. **Oticon Acto** gives you both, with full listening comfort and access to sounds that typically are difficult to hear.

**Acto** hearing devices wirelessly talk to each other, ensuring that both ears receive the best sound from Acto's advanced technology.

When it comes to clarity and comfort, two Oticon Acto instruments working in unison are an all together better solution.

When two Acto instruments communicate with each other, they more accurately respond to changes in your listening environment. Unwanted noise is reduced, while volume for speech remains loud enough for a comfortable and more understandable listening experience.

In fact, all the advanced technologies are coordinated, including the noise management system, the directional microphone system and the anti-feedback system. You simply enjoy high fidelity sound quality typically experienced in premium products.

# Better Connections For Life

**Acto's** ability to connect wirelessly to modern communication or entertainment devices allows you more flexibility while making you feel more confident.

**Acto**, in combination with **Oticon Streamer** and **ConnectLine™**, let you use your cell phone or landline phone, TV, radio or MP3 player with ease and clarity.

The connectivity options are here for you today; pick what you need now or add on as the need arises.

**With Streamer and ConnectLine you can access the convenience of modern entertainment and communication devices.**

A man and a woman are sitting on a brown sofa in a room with a large white-framed window. The woman, on the left, is wearing a grey cardigan over a white top and blue jeans, and is smiling. The man, on the right, is wearing a grey t-shirt and light blue jeans, and is looking towards the camera. A purple circular callout box is positioned in the upper right area of the image, containing white text. The background shows green foliage outside the window.

When the telephone rings, ConnectLine discreetly notifies you and lets you answer the call directly by the touch of a button. When the call ends, the TV sound returns automatically.

**Better Styles**  
To Choose From

## Discreet elegance

You might well forget that you are wearing Oticon Acto until you take them off! Not just because the sound is so comfortable and transparent. The discreet organic shape virtually disappears behind your ears letting you and everybody else forget they are there.

*Power models are available in ITC and CIC styles.*

Designed for style and ease of use, this discreet family of instruments has the right model for you.

# Better Colors To Choose From

Designed to match skin tone or hair color, Acto's colors are so subtle no one will know you are wearing them—unless you want them to.

Silver

Diamond Black

Chroma Beige

Silver Grey

Steel Grey

Chestnut Brown

Terracotta

Oticon's goal is to provide you with the best hearing technology available. You can rediscover your hearing and reconnect with important things in life. **Contact your hearing care professional today to find out more.**
