

Set yourself free  
from hearing loss.

# Introducing **Agil.**

The revolutionary hearing device by **Oticon** –  
the world leader in hearing care for over 100 years.

Don't let hearing loss  
hold you captive.

It's time to come out of isolation  
and enjoy life.

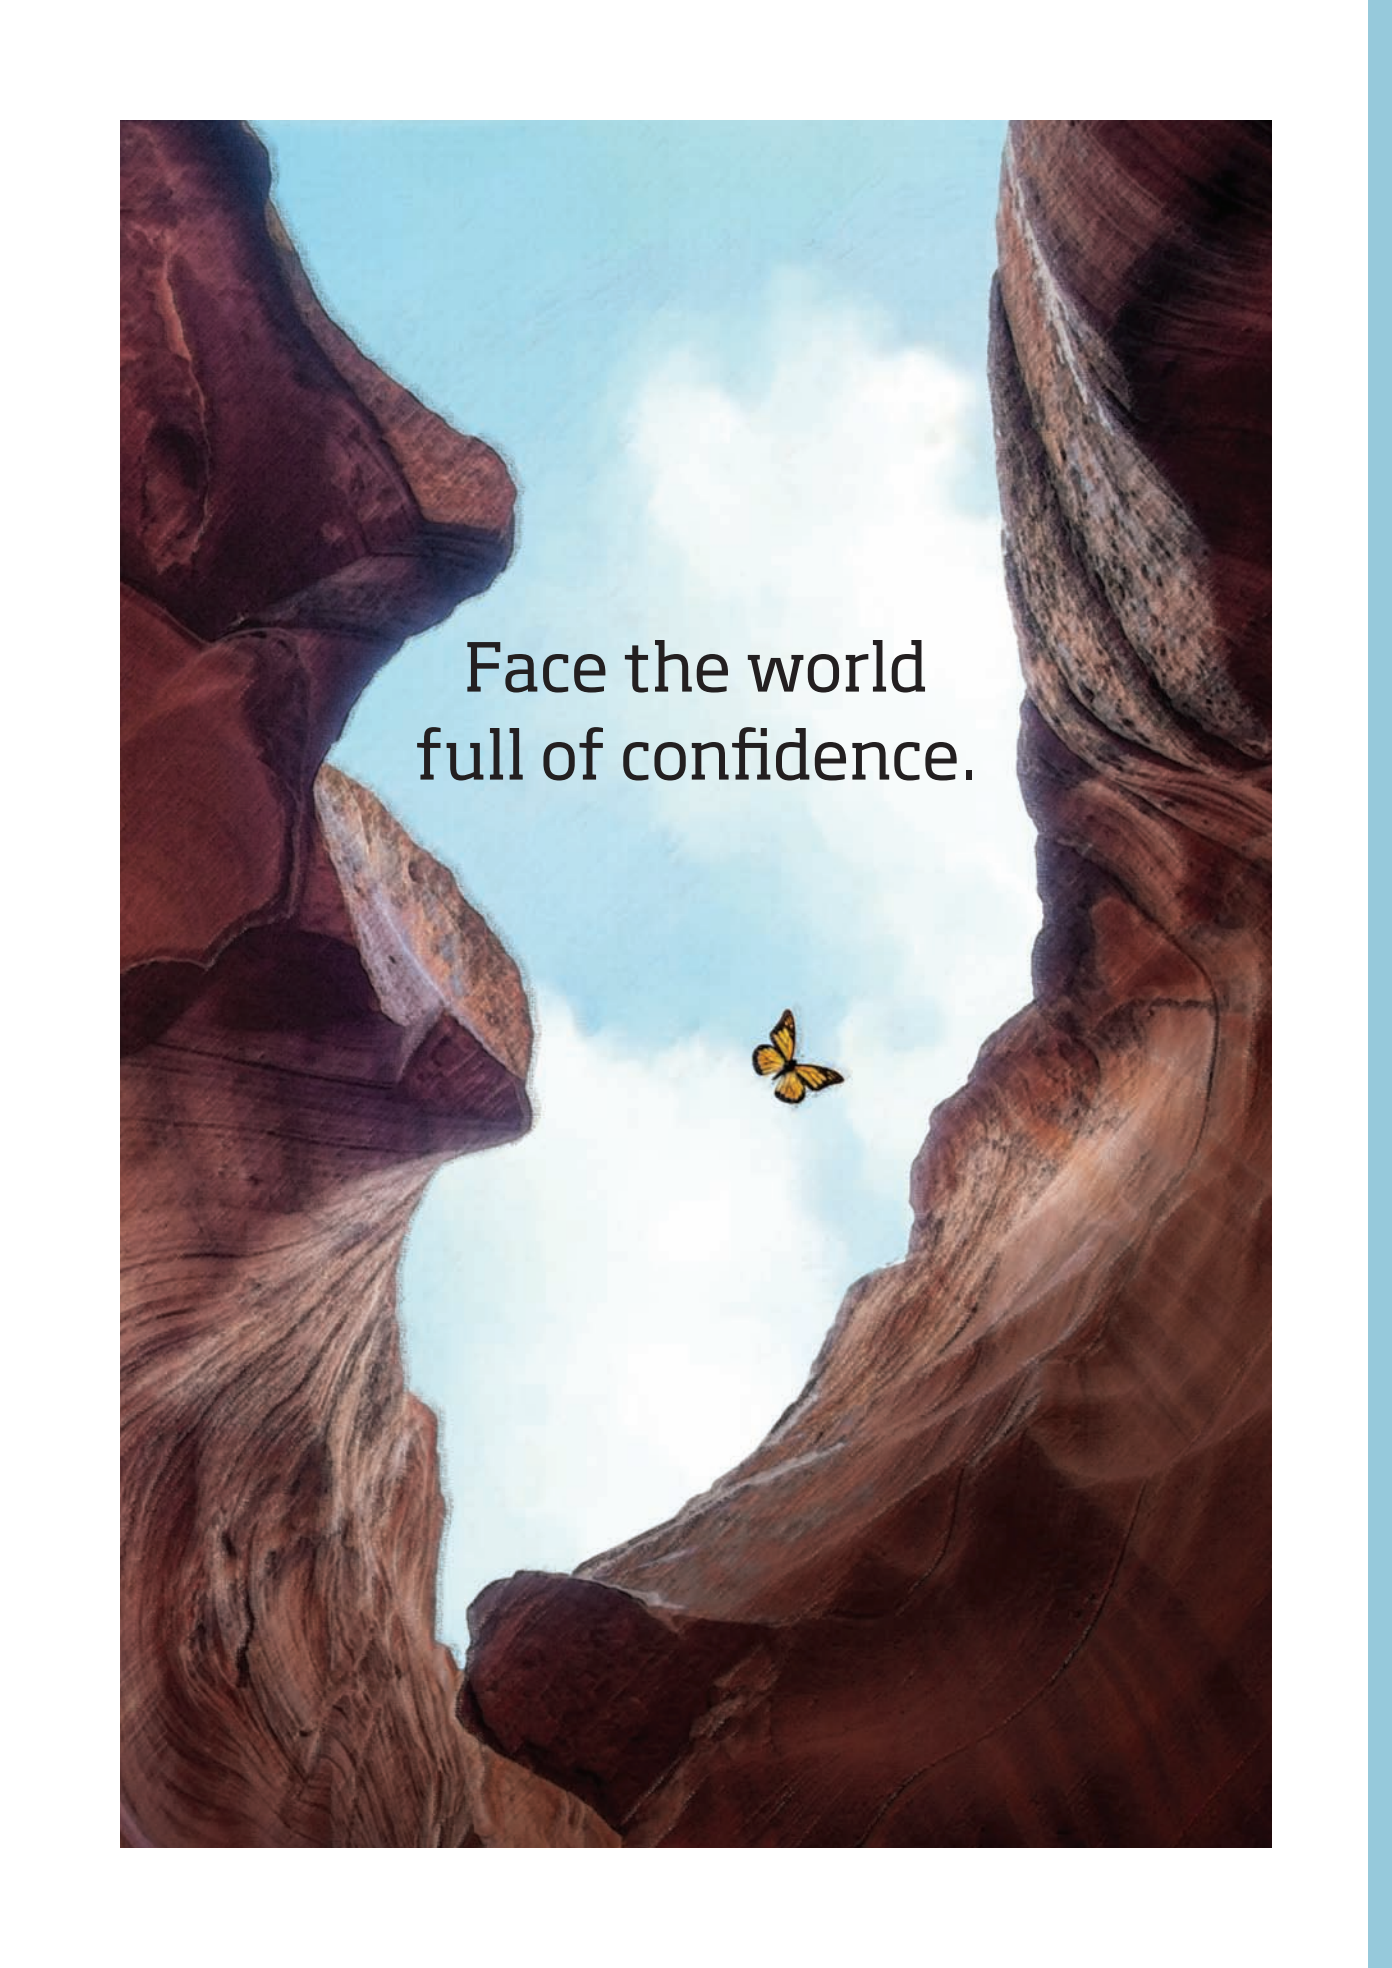

Are you having difficulty keeping up with conversations? Do you find yourself trying to read lips, or wanting to avoid noisy situations because you just can't hear? Perhaps your friends, family members or co-workers are losing patience, or maybe you are just becoming frustrated. Even minor hearing loss can make you retreat into a solitary place that is less vibrant, less full – less you. But it doesn't have to be that way.

Now there's a new breakthrough hearing device called **Oticon Agil**.

There's science built into **Agil** that supports the natural hearing process. Our state-of-the-art technology works in harmony with your brain to organize, select and follow the sounds and voices you want to hear, and ignore competing background sounds.

**Agil** actually takes the work out of hearing and listening so you understand more with less effort. Escape from the solitary world of hearing loss, and be free again.

With **Agil**.

A low-angle photograph of a canyon with reddish-brown rock walls. A small yellow and black butterfly is flying in the center of the frame against a blue sky with light clouds. The text "Face the world full of confidence." is centered over the image.

Face the world  
full of confidence.

Enjoy all the voices,  
music and sounds  
that color your world.

**Agil** is like no other hearing device on the market today. It's designed to improve your ability to hear and understand, even in difficult listening situations. There's no need to avoid crowded restaurants, conference rooms or sporting events. No need to turn up the volume on the TV. With **Agil**, hearing is effortless. Since you won't have to work hard to hear anymore, you'll have the energy you need to participate in conversations and your favorite activities.

**Agil** takes the work out  
of hearing and listening.

There's a sound processing chip inside **Agil** that allows it to do things that have been impossible until now. Its super fast speed means more power to differentiate sounds and more mental energy to understand, remember and participate.

Three unique features work together to make **Agil** one of the most advanced hearing devices on the market today.

- **Spatial Sound 2.0** – This technology supports the brain's natural process of understanding speech. For example, when you enter a crowded room, **Agil** picks up on certain cues that allow you to hear and understand what's going on. Thanks to spatial noise management, you will never be bombarded with a "wall of sound." Instead, you'll be able to hear the voices that are speaking to you, and shift attention to other voices as you choose.

- **Speech Guard** – Only **Agil** offers the ability to follow conversations so naturally and immediately. The device is designed to recognize natural speech cues, and keep competing noise or voices from distracting you, giving you a sense of quiet clarity. The process is simple and leaves you with more energy to listen, understand and act upon what is being heard.

- **Connect Plus** – Enjoy music like never before when you stream through any Bluetooth™ device. Enhanced Music Widening improves the quality of sound you hear, much like an equalizer on a stereo. And our improved Power Bass feature lets you hear the full breadth and range of music selections.

r life.

Finally. A hearing solution that transforms the way you live your life.

You may not want to admit it, but hearing loss can be exhausting. When you strain to catch portions of phrases or keep up with conversation, you use a number of mental resources that leave you fatigued. Gradually, you feel more and more alone – isolated from the people and things you care about most.

**Agil** sets you free by taking the work out of hearing and listening.

Because it lets you hear more naturally and more completely, you'll understand better. And have more energy to participate in all the things that make your life worthwhile.

Leave the world of isolation behind and discover a new world where you can be the person you want to be. The person you know you really are.

## A stylish, technologically advanced solution.

Have you put off getting a hearing device because you don't think you'll like how it will look or feel? Relax. **Agil** redefines your expectations of style and comfort, so you don't have to feel self-conscious.

Sleek and small, it's practically invisible behind the ear. Subtle colors blend in to complement your natural skin and hair tones for the ultimate in discretion.

Despite **Agil's** small size, it is easy to handle, so you can change the battery easily and operate a pushbutton switch without any trouble.

The people you meet may not even notice you're wearing a hearing device. But you'll notice a huge difference in how you can communicate with them.
