Hearing Is Our Concern™

# STAY CONNECTED

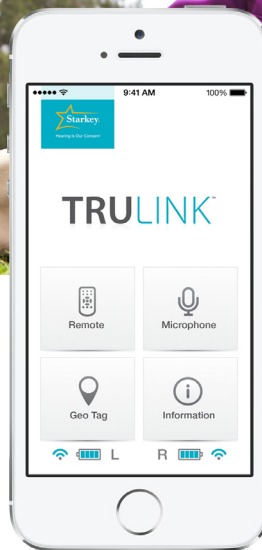

## Hear life to its fullest with Halo

Starkey's breakthrough hearing aids are engineered to connect directly to the iPhone, iPad® and iPod touch® via the easy-to-use TruLink Hearing Control app.

Together, Halo and TruLink deliver the most personalized hearing experience ever, and are designed to:

- Stream calls from your iPhone directly to your hearing aids using Bluetooth® 4.0 wireless technology
- Deliver pristine sound and exceptional listening clarity
- Help you hear comfortably in noise
- Eliminate buzzing and whistling
- Stream FaceTime®, music and more directly to your hearing aids

Halo hearing aids are compatible with iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPad Air, iPad 4, iPad mini with Retina display, iPad mini, iPod touch (5th generation)

# Halo™

***Starkey — America's premier  
hearing solution provider***

*When it comes to comfortable, great sounding and personalized solutions for their hearing needs, people everywhere ask for Starkey — the only American-owned and operated manufacturer of advanced hearing solutions. At Starkey, Hearing is Our Concern.™*

# Made for iPhone

# Made for today

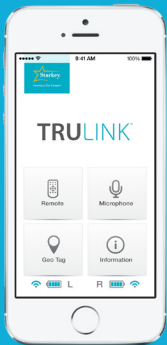

*Halo hearing aids are ideal  
for people who want to stay  
engaged and active.*

Halo are advanced, feature-rich hearing aids designed to help you hear everything better even in today's challenging environments. They are also engineered to work specifically with the iPhone, iPad and iPod touch, so that you can:

- Stream all audio generated from mobile Apple® devices wirelessly to your Halo hearing aids (imagine the hearing aids acting as wireless speakers)
- Use your iPhone to remotely control your hearing aids

# Connect to the things you care about most

Halo connects intuitively to the iPhone, iPad and iPod touch via Bluetooth technology and Starkey's easy-to-use TruLink app. TruLink offers additional features designed to enhance anywhere you go — so you can easily enjoy everything you do.

---

## **Pristine Audio Streaming**

Halo provides direct from the iPhone streaming of phone calls, music and media — so you can enjoy clear communication and pristine audio streaming anytime, anywhere, requiring nothing more than your iPhone.

---

## **TruLink Memories**

You can create up to 20 TruLink Memories using the SoundSpace tool on the TruLink app.

You can even geotag TruLink Memories if you want. This cool functionality simplifies life even more by using the built-in GPS feature on your iPhone to know where you are, then automatically changing memory when you are at the tagged location. For instance, “coffee shop” memory automatically activates when you walk into your favorite coffee shop.

## SoundSpace

TruLink SoundSpace enables you to easily adjust sound settings to your specific environment. By simply moving your finger on the screen, you can adjust sound to suit your preference — then save it as a TruLink Memory — so every place you're in sounds the way you like it best.

## Remote Control

With the touch of your iPhone, you can easily change volume and switch memories on your hearing aids. And because both are adjusted via a visual indicator bar, you have better control and nearly infinite levels to suit your preference.

## TruLink Adaptive Car Mode

With TruLink's Adaptive Car Mode, Halo will automatically change to a setting designed to reduce the annoying sounds of driving and enhance your "audio" driving experience.

## Siri® Integration

You can even have Siri read texts and emails directly to your Halo hearing aids.

Enhance  
every  
experience

# Fulfilling all your needs

## YOU WANT

## HALO DELIVERS

**To hear more comfortably in noise**

Advanced noise reduction technology and a precise directional microphone work together to reduce noise, and help make speech easier to hear in today's challenging environments.

**No buzzing or whistling**

Our industry-best feedback canceller provides feedback-free and comfortable listening all day long.

**Improved high-frequency audibility**

Patented technology replicates high frequency sounds (like women's and children's voices) in lower frequencies where they're easier to hear and understand.

**Enhanced phone communication**

Direct streaming of phone calls from your iPhone to your hearing aids enables clear and comfortable conversations.

**Great sounding music and media**

You can stream any music or media played on your iPhone directly to your hearing aids for a more immersive and impressive listening experience.

**Hearing that's personalized for you**

The SoundSpace tool on the TruLink app lets you make minor adjustments to sound quality to suit your particular preferences.

**Hearing that happens intuitively**

Geotagged memories automatically switch modes when the GPS feature in your iPhone detects you are in a tagged location. ("Home" memory activates when you arrive at your home.)

**Reliable, hassle-free hearing aids**

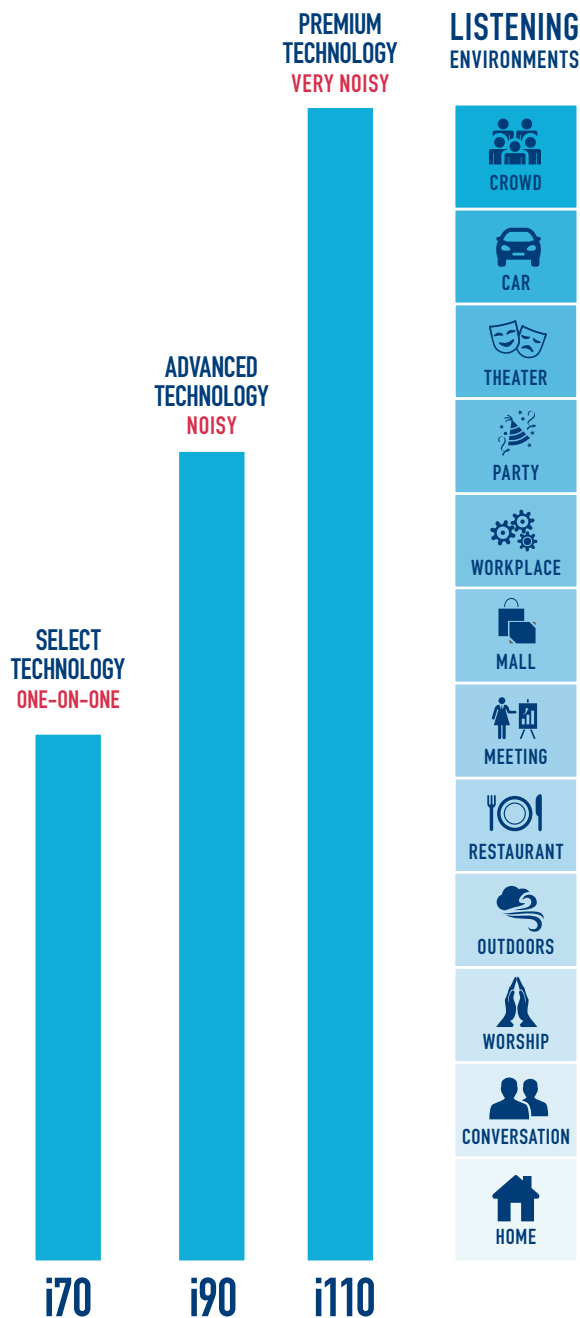

HydraShield<sup>®2</sup> nano-coating repels both water and wax, while the remote functionality of the iPhone lets you control and adjust your hearing aids more easily than ever.

# What's right for you?

Halo hearing aids are designed to accommodate and enhance a variety of listening environments.

What you need will depend on how busy and active you are, and what types of environments you frequent.

Your world  
is at your  
convenience

## Are you ready?

If you're ready to laugh more,  
smile bigger and connect conveniently  
to the things that make you happy,  
then you're ready to try Halo.

Halo and TruLink are compatible with iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPad Air, iPad 4, iPad mini with Retina display, iPad mini, and iPod touch (5th generation). "Made for iPod," "Made for iPhone," and "Made for iPad" mean that an electronic accessory has been designed to connect specifically to iPod, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone, or iPad may affect wireless performance. Apple, the Apple logo, iPhone, iPad, iPod touch , Siri and FaceTime are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc.
