HEAR LIFE TO ITS FULLEST WITH KINNECT

MicroTech's breakthrough hearing aids are engineered to connect directly to the iPhone, iPad® and iPod touch® via the easy-to-use TruLink Hearing Control app.

Together, Kinnect and TruLink deliver the most personalized hearing experience ever, and are designed to:

- Stream calls from your iPhone directly to your hearing aids using Bluetooth® 4.0 wireless technology
- Deliver pristine sound and exceptional listening clarity
- Help you hear comfortably in noise
- Eliminate buzzing and whistling
- Stream FaceTime® calls, music and more directly to your hearing aids

Kinnect hearing aids are compatible with iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPad Air, iPad 4, iPad mini with Retina display, iPad mini, iPod touch (5th generation)

kinnect™

***MicroTech — America's premier
hearing solution provider***

When it comes to comfortable, great sounding and personalized solutions for their hearing needs, people everywhere ask for MicroTech — an American-owned and operated manufacturer of advanced hearing solutions.

MADE FOR
iPhone

MADE FOR
today

***Kinnect hearing aids are ideal
for people who want to stay
engaged and active.***

Kinnect are advanced, feature-rich hearing aids designed to help you hear everything better even in today's challenging environments. They are also engineered to work specifically with the iPhone, iPad and iPod touch, so that you can:

- Stream all audio generated from mobile Apple® devices wirelessly to your Kinnect hearing aids (imagine the hearing aids acting as wireless speakers)
- Use your iPhone to remotely control your hearing aids

CONNECT TO THE THINGS YOU CARE ABOUT MOST

Kinnect connects intuitively to the iPhone, iPad and iPod touch via Bluetooth technology and MicroTech's easy-to-use TruLink app. TruLink offers additional features designed to enhance anywhere you go — so you can easily enjoy everything you do.

PRISTINE AUDIO STREAMING

Kinnect provides direct from the iPhone streaming of phone calls, music and media — so you can enjoy clear communication and pristine audio streaming anytime, anywhere, requiring nothing more than your iPhone.

TRULINK MEMORIES

You can create up to 20 TruLink Memories using the SoundSpace tool on the TruLink app.

You can even geotag TruLink Memories if you want. This cool functionality simplifies life even more by using the built-in GPS feature on your iPhone to know where you are, then automatically changing memory when you are at the tagged location. For instance, "coffee shop" memory automatically activates when you walk into your favorite coffee shop.

SOUNDSPACE

TruLink SoundSpace enables you to easily adjust sound settings to your specific environment. By simply moving your finger on the screen, you can adjust sound to suit your preference — then save it as a TruLink Memory — so every place you're in sounds the way you like it best.

REMOTE CONTROL

With the touch of your iPhone, you can easily change volume and switch memories on your hearing aids. And because both are adjusted via a visual indicator bar, you have better control and nearly infinite levels to suit your preference.

TRULINK ADAPTIVE CAR MODE

With TruLink's Adaptive Car Mode, Kinnect will automatically change to a setting designed to reduce the annoying sounds of driving and enhance your "audio" driving experience.

SIRI® INTEGRATION

You can even have Siri read texts and emails directly to your Kinnect hearing aids.

ENHANCE
EVERY
experience

YOU WANT

To hear more comfortably in noise

No buzzing or whistling

Improved high-frequency audibility

Enhanced phone communication

Great sounding music and media

Hearing that's personalized for you

Hearing that happens intuitively

Reliable, hassle-free hearing aids

KINNECT DELIVERS

Advanced noise reduction technology and a precise directional microphone work together to reduce noise, and help make speech easier to hear in today's challenging environments.

Our industry-best feedback canceller provides feedback-free and comfortable listening all day long.

Patented technology replicates high frequency sounds (like women's and children's voices) in lower frequencies where they're easier to hear and understand.

Direct streaming of phone calls from your iPhone to your hearing aids enables clear and comfortable conversations.

You can stream any music or media played on your iPhone directly to your hearing aids for a more immersive and impressive listening experience.

The SoundSpace tool on the TruLink app lets you make minor adjustments to sound quality to suit your particular preferences.

Geotagged memories automatically switch modes when the GPS feature in your iPhone detects you are in a tagged location. ("Home" memory activates when you arrive at your home.)

HydraShield^{®2} nano-coating repels both water and wax, while the remote functionality of the iPhone lets you control and adjust your hearing aids more easily than ever.

WHAT'S *right for you?*

Kinnect hearing aids are designed to accommodate and enhance a variety of listening environments.

What you need will depend on how busy and active you are, and what types of environments you frequent.
