Meet Max

Super Power mini shown at actual size

Max™ is a Super Power hearing aid designed with determination to give those with severe to profound hearing loss what they need most.

Max wants you to have all the power you need to hear to your full potential.

Max wants you to experience better speech understanding.

Max wants you to maintain awareness of your surroundings.

Max wants you to enjoy clear sound quality.

Max wants you to live free of annoying feedback.

Get to know Max. You'll be glad you did.

Max Super Power mini

Max understanding Max awareness

You need to understand speech to communicate and feel connected. You need to be aware of the sounds around you to feel comfortable and safe. Max has features that let you do both.

Hear more sounds

Max shifts speech sounds away from the areas where your hearing is most damaged and into the range where you can hear them.

Put the spotlight on speech

Automatically experience better speech understanding without giving up awareness of everyday sounds.

Listen without the whistle

Max provides all the power you need without the annoying whistling.

Be comfortably aware

Max reduces sudden, loud sounds to a comfortable level, without interrupting awareness.

Enjoy the phone again

Automatically hear the caller's voice clearly in both ears without an accessory.

Max confidence

Reliability takes on an entirely new meaning when you depend on your hearing aid to connect you to everyday life.

It's okay to get wet

Don't worry about taking a blast from the hose or getting caught in the rain. Max can take it, thanks to a special protective coating.

It's okay to sweat it out

Perspiration and oils can't break the bond between Max and its coating.

It's okay to play extreme

Drop it, shock it, watch the temperature rise, and tackle dust and dirt head-on. Max will keep performing.

The power of possibilities

Max offers accessories that let you plug in, take control and extend your listening options.

Hands-free listening

uDirect™ 2 delivers clear audio directly to both hearing aids from mobile phones, TVs, FM receivers and MP3 players. It also acts as a remote for quick access to hearing aid functions.

Effortless TV

uTV™ 2 wirelessly sends stereo audio from the television directly to both hearing aids through uDirect 2.

Discreet control

Max offers a choice of two remote controls for easy adjustment of your hearing aid controls.

Safe and aware at home

The Smart Alert™ System lets important household alerts – such as telephone, doorbell and fire alarm communicate directly with your hearing aids. A bed shaker extends safety awareness through the night time.
